Benefits

Why Choose ESPL Attendance Application?

- **Accuracy**: Eliminate manual errors and ensure location-based attendance validation through geofencing.
- **Geofencing Technology:** Ensures employees can only mark attendance when they are within a specific geographical boundary (office premises or remote work sites).
- **Time-Saving:** Automated system reduces administrative workload.
- **Real-Time Reporting:** Managers can view attendance data and employee attendance locations in real time.
- **Customizable**: Adapt the application to fit your company's unique needs.
- **Seamless Integration:** Easy integration with payroll and other HR systems.

Web Portal for Monitoring Attendance: The ESPL Attendance Application comes with a dedicated web portal for managers and HR teams to easily monitor employee attendance, generate reports, and gain insights. The portal offers a range of features for day-to-day and monthly tracking of attendance.

Key Features of the Web Portal:

1. **Daily Attendance IN/OUT Report:** Track real-time employee check-ins and check-outs, with time stamps available at the click of a button. The portal provides easy filtering and search options to monitor individual or team attendance.
2. **Month-End Report:** Automatically generate a comprehensive month-end report detailing each employee's attendance records, including total work hours, overtime, and leave days. Exportable in multiple formats (PDF, Excel).
3. **Exceptions Report:** Identify discrepancies or anomalies, such as missing attendance logs or irregular punch-ins, in the Exceptions Report. This report helps HR teams catch errors and resolve them promptly.
4. **Defaulter Report:** Monitor employees who fail to meet attendance expectations through the Defaulter Report. It highlights individuals with frequent late arrivals, absences, or inconsistent attendance patterns.
